Our 88th Year

Laurence R. Kern, Owner Phone: (630) 251-2805
 Zachary Schuetz, Manager Fax: (815) 879-0621

Hello:

Our family started in the automotive business in 1923 as an automotive repair shop. During the 1920's we became a Graham-Paige dealer. We relocated to new facilities in 1937 and also became a Phillips 66 retailer and a Cushman Motor Scooter dealer. In 1940, we became a franchised Cadillac dealer. In 1962, we also became a Rambler (American Motors) franchised dealer. The dealership activities were ended in 1980, after 40 years of association with Cadillac and American Motors. From 1981 on, we began selling both new and used Cadillac parts. As you can see, we have a long association with the automotive industry.

While we are a Cadillac parts vendor, we often purchase parts lots that contain Cadillac parts as well as Buick, Chevrolet, Oldsmobile, Pontiac, GMC Truck parts and occasionally other make parts such as Ford, Chrysler and other miscellaneous automotive items. Since October 1999, in addition to our other normal business activities, we have been spending a considerable amount of time identifying and determining the specific applications of parts we have obtained. All newly identified inventory is entered into our computer inventory system. We use our computer inventory system to create and post lists on our internet website, <http://kernmotorco.net/parts/>. Please check back frequently, as there are always new items added to the lists and general inventory updates to account for sales. So our inventory is ever-changing.

Please be aware that in the process of parts identification, we check for application to Cadillac first. If the part has application to Cadillac, we add it to our Cadillac inventory and do not check for interchange with other GM divisions. If a part does not have Cadillac application, we research the application to other GM Divisions; however, we may miss some of the applications between Divisions. Therefore, please check the other Divisional lists for any specific parts you may be interested in as you may find them in a list other than the make of your car. If you ask us about the parts interchange information for a specific part you see on another one of our lists, we will probably be able to tell you if it has application for your need. We have invested a considerable amount of money in General Motors Parts Books, Microfiche based parts books, and many other reference materials to enable us to give accurate and specific application information for parts we carry.

On our website, our lists are organized as follows:

- | | |
|-------------------------------|--|
| New Old Stock GM items | These files appear as <i>gm division_NOS.doc</i> (examples CADILLAC_NOS.doc, PONTIAC_NOS.doc) |
| Non GM New Old Stock and used | Contained in OTHER_PARTS.doc; This file contains FORD, CHRYSLER, independent makes and other miscellaneous automotive related items. |
| GM Used | Contained in CADILLAC_GM_USED.doc; This file contains used Cadillac and other GM divisions used parts. |

IF YOU DO NOT FIND A PART YOU ARE LOOKING FOR, PLEASE ASK! Our lists do not have everything we carry or can supply! We always have an extensive inventory of nice new and used Cadillac parts for sale and many are not contained in our online lists, so please inquire about availability. We may have that part you have been looking for or we may be able to track down a part we do not currently have in stock.

We also provide rebuilding/reconditioning services for many items such as headlamp switches, neutral safety switches, fuel tank sending units, clocks, relays, seat adjuster transmissions, window motors, aluminum front engine covers and many other items. Many items are in stock and available on an exchange basis.

Thank you.
